Transcriber's Office
FLOOR DEBATE

February 12, 2003 LB 371

only trucks, and the problem being with trucks. Isn't it the case now that you have cars that are potentially put together with parts from several different manufacturers, so that...my question is simply, does this same problem arise with cars and car dealers?

SENATOR AGUILAR: First of all, I've never heard of a problem in that area. In other words, the manufacturers are obviously honoring the warranties in that area. So we've never had a problem that we need to address in that manner.

SENATOR RAIKES: Has the practice of a truck manufacturing...or, manufacturer not honoring a warranty, is this a long-standing practice? Has this been recent? Or, what can you tell me about that?

SENATOR AGUILAR: Well, I think it's been going on for at least a couple of years.

SENATOR RAIKES: Okay. This would be, then,...you mentioned a provision that would cover certain components, not all components, and it's responding strictly to the instances that you've heard about.

SENATOR AGUILAR: That's absolutely right. And as I mentioned, it's the engine, transmission, and rear axle. Number one, that's the only problem they have had with them not warranting those parts. And those also are the three biggest-ticket items on the truck.

SENATOR RAIKES: Okay. Thank you, Senator.

SPEAKER BROMM: Thank you, Senator Raikes and Senator Aguilar. Any further discussion? Senator Aguilar, you're recognized to close on the advancement of LB 371.

SENATOR AGUILAR: Yes. I'd just like to ask for advancement to Select File of LB 371. Thank you.

SPEAKER BROMM: Thank you, Senator Aguilar. Members, you've heard the closing. The question is the advancement of LB 371.
